EDUCATION

Galgotias University (Greater Noida)	2022–2026
<i>Bachelor of Technology in Computer Science</i>	<i>CGPA: 9.36</i>
Growell Public School (CBSE)	2020–2021
<i>Intermediate</i>	<i>81.7%</i>
Growell Public School (CBSE)	2018–2019
<i>High School</i>	<i>83.8%</i>

INTERNSHIP EXPERIENCE

Cognizant Technology Solutions	Feb 2026 – Jun 2026
<i>SDET Intern</i>	<i>Chennai, India</i>
- Developed and tested the Skill-Based Task Allocation System using Spring Boot. - Created Selenium WebDriver automation scripts in Java using the Page Object Model (POM) framework and TestNG. - Performed API testing using Postman and backend validation using SQL. - Executed functional, regression, and smoke testing and managing builds with Maven.	

PROJECTS

Skill-Based Task Allocation System / Spring Boot	Feb 2026 – Jun 2026
<i>SDET Intern Project</i>	<i>Cognizant Technology Solutions</i>
- Developed a full-stack web application using Spring Boot, Angular, and MySQL to automate skill-based task allocation among employees. - Designed and implemented RESTful APIs for task assignment, employee management, authentication, and project allocation. - Developed and maintained an automation framework using Java, Selenium WebDriver, TestNG, and the Page Object Model (POM) design pattern. - Automated end-to-end UI test scenarios including login, task assignment, employee management, and workflow validation, reducing manual testing effort. - Executed regression and functional test suites using Maven, managed source code using Git, and validated backend data with SQL.	
XAI for Clinical Decision Support	Sep 2025 – May 2026
<i>Team Based Research Project</i>	<i>Developer</i>
- Developed an explainable AI framework for heart disease prediction to enhance transparency in clinical decision support. - Implemented LIME and SHAP interpretability models to explain black-box machine learning predictions for healthcare professionals. - Evaluated model performance and validated feature importance to ensure reliable decision-making.	

TECHNICAL SKILLS

- Languages:** Java, SQL, HTML, CSS, Javascript
- Automation:** Selenium WebDriver, TestNG
- API Testing:** Postman, REST APIs
- Testing Concepts:** Functional Testing, Regression Testing, Smoke Testing, SDLC, STLC

PUBLICATIONS

Explainable AI for Clinical Decision Support in Heart Disease Prediction	May 2026
<i>IEEE IC2PCT 2026</i>	<i>Greater Noida, India</i>
Authors: Santosh Kumar, Avi Jain, Durgesh Kumar Shukla - Published in 2026 IEEE 6th International Conference on Computing, Power, and Communication Technologies (IC2PCT) and indexed on IEEE Xplore (DOI: 10.1109/IC2PCT68894.2026.11584408). - Proposed an explainable AI architecture using LIME and SHAP to enhance model interpretability in clinical heart disease risk assessment.
